

# GUIDANCE SHEET ON SLATERS HEELS PUBLISHED BY NFRC

Forster have helped the NFRC publish a new guidance sheet detailing the safe installation, fitting and dismantling of Slater's Heels (roof scaffolds/irons). The guidance sheet which was fully supported by the HSE was produced by Forster and CALA Homes in conjunction with the Scottish House Builders Health & Safety Forum. "We were approached by the HSE to produce a guidance sheet to ensure safe installation of slater's heels. We were only too happy to oblige and worked closely with CALA Homes to produce the document", explained Forster Chairman, John Forster. To view the full published Slater's Heels guidance sheet visit the News section of [www.forsterroofing.co.uk](http://www.forsterroofing.co.uk)
