

SCOTCEM ROOFTILES

Lafarge Roofing Ltd have recently announced the immediate closure of their Scotcem manufacturing facility at Newbridge, Edinburgh. Lafarge who manufacture the Redland range of tiles at their nearby Cowie plant in Stirling consider the smaller Scotcem plant as unviable. Scotcem tiles will no longer be available once the current stocks are exhausted. With a relationship stretching back over many years we are saddened by the closure but Forster will be contacting all house builder customers with effected sites to discuss the implications and arrange a smooth migration to the Redland tile range. Please do not hesitate to contact myself on 01356 628560 if you have any concerns on how this may affect you.
Roger Welsh, Forster Managing Director
